Brainshark

Infrastructure Improvements

In this release we are implementing the first of several performance and responsiveness enhancements, targeted at global users. As a first step we are making improvements to our infrastructure in the area of content delivery acceleration. We are confident that you will notice an improved global viewer experience. Company Administrators were notified of this update in early January.

FIXED

The following Brainshark related issues were addressed in this release:

- View receipts not being sent for PDF document presentations
- Receiving a “Conversion failed” message when uploading .xlsx files
