NEW

Brainshark

Increased Abilities for Folder Administrator Role

Folder Administrators can now be given permissions to manage all presentations in their folders. Folder Administrators will see this option under “Administration” > “Manage Content” and will be able to edit content and reassign Authors.

Note: This added functionality only applies to Presentations, *not* to Courses, at this time.

FIXED

The following issues were addressed in this release:

- Accessibility with screen reader technologies for viewing Brainshark content from a laptop or desktop
- SFDC syncing is case sensitive when matching email addresses and it shouldn't be
- Background Audio causes error when copying a presentation
- SCORM course will not execute due to invalid referencing in the 3rd party SCORM package
- Play/Pause not working properly in Chrome Browser on Android
- Groups by User report brings back duplicate data
- Bulk upload of SlideShark users sends out incorrect welcome email
- While Viewing content a NAN:NAN:NAN error may appear
