Product Release Notes

NEW

Brainshark

Allow myBrainshark users to download content

myBrainshark users are now able to download their content as MP4 video files for use in other ways. They can download by clicking the "Download" link located in the presentation's "Things You Can Do" menu.

Uploading Question Backgrounds

The ability to upload a PowerPoint slide to be used as a question background image is no longer available. In order to create a new question background image, you must upload an image file (in JPG or PNG). This will not affect any of your existing question background images regardless of how they were added. In addition, PowerPoint templates that are used and uploaded as presentations will be automatically available to be used as question backgrounds.

Add SCORM Duration to Learning Reports

Certain Learning Reports were edited to add a new column called SCORM duration which will be populated for SCORM based courses.

UX Updates:
- An "Active author" count was added to the Company Administration page.
- Font and spacing updates have been implemented in the list view of "My Content".

Sales Accelerator

Updates to SlideShark in Content Tabs

Sales Accelerator users are now able to:
- Added ability to Track "Present" activities on Accounts and Opportunities, this is in addition to Contacts and Leads.
- Display the SlideShark presentation in full screen when broadcasting from the desktop.
- Track mobile SlideShark view activity (pending upcoming SlideShark app release)

SlideShark Filters

Sales Accelerator authors can now apply their company's custom filters to their SlideShark content. The same robust mapping options they have been using on presentations is now available with SlideShark content.

Updates to Reporting

New Opportunity reports and analytics are now available to answer important business questions that Sales Managers ask.

FIXED

The following issues were addressed in this release:

- Publishing to YouTube error.
- Enhanced SCORM Reporting to LMS.
- Exceedingly long Clickstream durations on Desktop views.
- Transcript spelled incorrectly on Sales Accelerator Chatter/ Brainshark Tab.
- Navigation issues with Unhooked SCORM package with click "play" to advance configuration.
- Problem adding Group to existing Group.
