Product Release Notes

NEW

Brainshark

- Improved YTD reporting in the Monthly Utilization Report
- Ability to disable the option to share via social sites (e.g. Facebook, LinkedIn, Twitter, other)
[request must be made to Brainshark Support]

Brainshark Rapid Learning

- Modified the flow when a learning author goes to 'Create Course' and opts to select 'Create a New Course'. The author will be presented with a new flow so that they can create any kind of course from the start – not just PPTs.
 - Replaced the 'light bulb' thumbnail used for non-Brainshark courses with a new image
 - Updated the Student Transcript report to now return enrollment data that INCLUDES archived courses.
-

FIXED

The following issues were addressed in this release:

- Unable to delete audio from a slide when using Chrome
- Lowercase letters intermittently getting capitalized when entering module titles
- Screen slightly truncated when viewing a presentation with telephone playback
- Unable to re-arrange attachments when using IE 9 and IE 10 in compatibility mode
- New users not being enrolled in curricula when using self-registration
- Intermittent error when attempting to upload a SCORM package
- Group Managers with view permissions not able to access Group Manager reports
- Viewing Time field on Course Enrollment report not displaying correctly in Excel
- When importing a Microsoft LiveMeeting a message indicating incorrect username/password is received
- In some cases, public user views appearing as private
- Podcast audio restarts at beginning during playback
- Error when uploading large sized SCORM files
- Failed status is incorrectly returned via the soap API
