# BRAINSHARK®

*August 12, 2017*
Product Release Notes

## NEW

### Brainshark Training

**Course Catalog Filters**
Brainshark Learning Authors can assign filters to their courses. Students select filters in the Course Catalog to narrow Course and Curriculum results. The same set of filters is used in the content portal. The Company Administrator creates and enables / disables filters for the content portal and course catalog. Each filter may be enabled for the content portal only, the course catalog only, or both the content portal and the course catalog.

**Attachments on SCORM and URL Courses**
Brainshark Learning Authors can add an attachment to a SCORM or URL course, or any course created using a customer defined content type. Attachments are displayed to students on the My Enrollments page and the individual course details page.

**HTML Learning Notifications**
Editable Learning and Platform email templates are now available in HTML and plain text. Company Administrators can update the HTML templates to modify formatting and appearance and include images and links. A new company wide header and footer template is available to provide an easy way to update the header and footer for all HTML emails.

Note: Script tags are not supported.

### Brainshark Mobile App

Brainshark's new mobile app release provides access to training, coaching, and content resources in an app designed specifically for Android and iOS devices. Mobile app users can view and share presentations, launch assigned courses, browse the course catalog and respond to coaching challenges. Challenge reviewers can view and rate submissions.

Known limitations: URL and SCORM courses are not accessible from the mobile app.

## FIXED

**Brainshark Pro**
- Enhanced SCORM content does not return completion status when Flash is disabled
- Default sort on My Courses and My Curriculums pages is Topic instead of Created
- SFDC VFP for Content Portal does not show the full search text box
- Unexpected error accessing My Courses page
- Brainshark CRM Connector for SFDC: Some Leads do not allow additional to List to work
- Presentations throw an error before 100 non-SCORM views
- Question background images not updating
- SCORM Completed Enrollments show as deleted in SFDC
- Unable to print slides in Chrome for a presentation
- Replace not working for .pdf files in SlideShark

**Brainshark Mobile**
- Mobile App - Activity Summary info not accurate
- Removing Pause after audio completes on a URL slide not honored on iPhone
