Brainshark

Change Content Thumbnails

Authors now have the flexibility of controlling the thumbnail image that represents their presentation or course wherever thumbnails are used (i.e. Learning Locker, content tabs in Sales Accelerator, the content portal). This way the author can choose a thumbnail that best represents the content they created.

For How-To instructions, check out this [Changing Thumbnail Images](#) tutorial.

FIXED

The following Sales Accelerator related issues were addressed in this release:

- Favorites icon not appearing on Chatter posts
