

# BRAINSHARK®

*May 12, 2018*  
Product Release Notes

## NEW

### Brainshark Training

#### Course Details Redesign

The Course Details page is converted to a modal from a standalone page so that learners may view course details without leaving the initial page they are viewing (e.g. My Enrollments, Curriculum Details). The design is updated consistent with other UI changes in Learning and the modal is responsive to browser resizing.

#### Course Catalog Redesign

The Course Catalog is redesigned consistent with other UI changes in Learning. The page is responsive to browser resizing.

#### Improvements to Learning pages

- Sort by 'Recently Viewed' on My Enrollments: Students may select to sort existing enrollments by most recently viewed. The sort option takes effect for course / curriculum views after the May 12<sup>th</sup> release.
- Hover text for course titles on Curriculum Details: Hover text has been added to course titles on the Curriculum Details page to accommodate courses with long titles.
- Collapse / Expand Progress Tracker on My Enrollments: Students may collapse the Progress Tracker on the My Enrollments page. An alert bell will activate when new learning items with a due date are assigned to notify students to expand the Progress Tracker. The student's selection is remembered on their next visit.
- Curriculum duration: The curriculum duration displayed to students and authors is now calculated using the audio duration associated with the course if the course estimated duration field is not populated.
