Product Release Notes

NEW

Brainshark Mobile App, 4.1.2

Improvements across Learning, Coaching, and Notifications
In the 4.1.2 release, mobile app users will see various improvements and fixes throughout the app.

These improvements include:
- Swipe left to delete a notification, swipe right to mark unread
- Play button suppressed on Instructor-led training type courses
- If Machine Analysis is enabled on a Coaching activity, users will be prompted to complete from the desktop or mobile browser
- Participants will see a new "Processing Video" animation while their Coaching video submission finishes converting
- Learning Badges will display next to a user's profile picture
